of clay blocks

The companies operate a carbon footprint management system based on the verico standard, with the aim of continuously improving the Carbon footprints, as proof of climate neutrality at product and organizational level

An audit to review the greenhouse gas inventory was carried out on May 5, 2021 carried out at the Wöllstein site.

Langenbach, May 30, 2021  Daniel Frentzen
verico SCE, Hagenastrasse 7, 85416 Langenbach

Greenhouse gas emissions which cannot be avoided and which are confirmed during the review in the external audit can be broken down down to individual products and offset through compensation (climate protection projects). The compensation of the calculated emissions is subject to an external review. the Decommissioning of the emission certificates is verified. These certificates are verified emission reductions from climate protection projects that follow high, globally recognized standards.
